

SCHMIDT + HAENSCH is a highly innovative, family-owned company based in Berlin, which has been in existence for more than 150 years. The company develops, manufactures and distributes optical-electronic analyzing instruments and process sensors worldwide.

For the expansion of our development team in Berlin we are looking for an experienced, dynamic

Software developer for embedded hardware programming (m/f/d)

Your Tasks:

- Hardware-related programming of embedded ARM processors (Cortex M0, Cortex M4, [optionally Cortex M7/A9 with embedded Linux])
- New and further development of programs and software for new products and devices, this is done under the guidance of an experienced development manager

Your Profile:

- University degree in computer science, electrical engineering or a similar field of study or in-depth knowledge of computer science or electrical engineering or similar qualifications
- Confident handling of PC as well as profound knowledge of Linux
- Very good knowledge in data processing
- Basic knowledge in electrical engineering
- Extensive knowledge of ARM - architecture / periphery as well as knowledge in C (and C++)
- Self dependent, goal oriented and independent working style
- Good knowledge of English, both written and spoken
- High ability to work in a team

Nice to have:

- Additional knowledge in programming languages and/or script languages (e.g. Java, Javascript, Perl, Bash, Basic, Pascal)
- Basic physical understanding of the structure and functioning of optical-electronic measuring devices
- Knowledge in working with circuit diagrams

We offer you:

- A pleasant working atmosphere with flat hierarchies
- An exciting, diversified and autonomous field of activity
- Be part of a motivated team
- A very flexible working time

Does our offer sound interesting?

If so, we look forward to receiving your complete application documents.
