

SCHMIDT + HAENSCH GmbH & Co. is one of the world's leading manufacturers of optical-electronic measuring instruments for laboratory and industry. With the development of our polarimeters and refractometers for analysis in pharmacy, chemistry as well as in the food industry, our employees ensure that our international customers are one step ahead in their markets.

For immediate reinforcement of our development department in Berlin we are looking for

Software developers (m/w/d)

Your area of responsibility includes programming user interfaces for controlling, connecting and configuring end devices. You further develop existing software and develop new programs for new products and devices.

Your profile:

- Proven multi-year (>3 years) experience in C++ software development and graphical user interface development, ideally with WT framework.
- Knowledge of web design and/or scripting languages is desirable, e.g. JavaScript and CSS
- Knowledge of data processing and structures as well as knowledge of the most common operating systems is an advantage
- Basic knowledge of electrical engineering
- Confident working with electronic measuring equipment
- Independent, structured, self-reliant and result-oriented way of working
- Communication skills in German and English, both written and spoken
- High ability to work in a team

**SCHMIDT
HAENSCH**
family-owned since 1864
150 years of quality

What we offer:

- A pleasant working atmosphere with flat hierarchies
- An exciting and responsible field of activity
- The cooperation in a motivated team
- Flexible working hours

Does this catch your interest?

Then we look forward to receiving your complete application documents with your salary requirements and possible availability.
