

SCHMIDT + HAENSCH GmbH & Co. is one of the world's leading manufacturers of optical-electronic measuring instruments for laboratories and industry. With the development of our polarimeters and refractometers for analysis in the pharmaceutical, chemical and food industries, our employees ensure that our international customers are one step ahead in their markets.

For the next possible date, we are looking for a motivated and dynamic employee for our location in Berlin in the area of

Electrical installation (m/w/d)

- Early shift limited, flexible working hours and flexitime possible

Summary:

As an electronics technician (m/f/d) you will support our production team as part of our product expansion. As part of a team and under the guidance of an experienced production manager, you will manufacture, commission and test the electrical and electronic components for our measuring instruments. The interesting and varied job requires knowledge of electrical engineering as well as safe handling of the essential tools of electrical engineering. A confident handling of the PC, knowledge of data processing and a good understanding of the English language are desirable.

Your tasks:

- Manufacture of electrical and electronic components for opto-electronic measuring instruments
- Commissioning and testing of opto-electronic measuring instruments
- Delivery capability check
- Troubleshooting and repair of electronic components
- after successful familiarisation with production, transfer to the test field and/or service departments is possible

- Data processing

About you:

- completed training as an electronics technician (e.g. electronics technician for devices and systems)
- Independent, goal-oriented and self-reliant working style,
- High ability to work in a team
- sound theoretical and practical knowledge, especially in the fields of analogue and digital technology
- good and safe handling of soldering tools
- very good PC user skills and sound practical experience, especially with MS - Office,
- experience in dealing with ERP systems,
- confident communication in English

What we offer:

- An international, dynamic team from different disciplines and with very different talents - we love diversity
- A pleasant working environment and a family atmosphere
- Flexible working hours and working patterns
- Varied and interesting tasks with many small and large challenges
- Experience in a global company that is constantly developing and offers a wide range of development and promotion opportunities
- A position where you can gain a lot of experience in the field of measuring instruments

Interested? - Then we look forward to receiving your complete application documents with your salary requirements and possible availability!
