

SCHMIDT + HAENSCH is one of the world's leading manufacturers of electro-optical measuring instruments for laboratory and industrial applications. With the development of our polarimeters and refractometers for concentration determination in the pharmaceutical, chemical and food industries, our employees ensure that our international customers are one step ahead in their markets. We rely on research and development, sustainable innovation and our employees.

To strengthen our team at our Berlin location, we are looking for the next possible support for the

Adjusters in the field of fine equipment manufacturing (m/w/d)

- Early shift limited, flexible working hours and flexitime possibility

Do you feel like being part of a highly motivated manufacturing team that supports our customers worldwide and integrates our technology into productions and laboratories?

Then this is the right place for you!

We provide you with the right environment for contemporary work - this includes flexible working hours and an international working environment. Our global customers offer complex, exciting projects. Here you can use your expertise and develop your experience. Of course, we will actively train you in your tasks and support you in other ways as you make a successful start in the company. With regular, qualified further training opportunities, you will stay up to date and shape your personal development. As a family business, we focus on social responsibility, human interaction and a cooperative atmosphere.

Your tasks:

- Assemble and adjust new optical-electronic measuring instruments in a team and under the guidance of an experienced production manager.

- to grip and measure quartz plates
- assemble accessories for polarimeters, refractometers and colourimeters
- troubleshoot and repair all current instruments and previous models
- assemble and wire mechanical and electrical components and equipment
- Testing and final acceptance of measuring instruments
- certificate preparation

About you:

- You have completed an apprenticeship as a precision mechanic / industrial mechanic (precision equipment manufacturing), or similar training
- You have knowledge of precision mechanics, if possible optics and electrical engineering
- You work independently and goal-oriented and have the ability to work in a team
- You have good data processing skills, can handle MS Office and have knowledge of ERP systems, for example Sage Office Line
- You have good basic knowledge of electrical engineering and / or optics

What we offer:

- an attractive remuneration model
- flexible working hours with flexitime, individual break arrangements and attractive individual holiday arrangements
- pleasant and informal working atmosphere with colleagues and supervisors who are always willing to listen and support you
- Lunch canteen with food of your choice and water dispenser
- Various additional benefits such as a contribution to the company pension scheme and capital-forming benefits, continued payment of wages for 2 days in the event of a sick child
- Additional remuneration of 50 EUR in kind in the form of a BVG ticket, petrol voucher, company bicycle or lunch allowance
- Good connections to the S-Bahn and U-Bahn and to the motorway with company car park

Interested? - Then we look forward to receiving your complete application documents with your salary expectations and possible availability!
